

# What is the difference between the Levels?

## **BEGINNER (Pre-school and Kindergarten for ages 5-7)**

Now you can take your students on an unforgettable **stick-figure** journey through the Bible. Students will learn through a **hands-on**, interactive Bible study experience using stick figures and symbols to remember biblical events and important principles. Grapevine Studies is an effective method for **discipling five to seven year olds!** One book has all you need: lessons, memory verses, and reviews.

- Learn the lessons in chronological order but do not use timelines
- Read, discuss, and stick figure the lesson
- Large space provided for drawing (2 per page)

## **MULTI-LEVEL (Ages 7 and up)**

Take your students on an exciting Bible study journey through the Old or New Testament with one of our Bible studies. The multi-level Bible study will give **context** and **chronology** to the biblical accounts with which your students are familiar, while increasing their overall knowledge of the Bible. Students will learn the **Bible timeline** and then study each point of the timeline by **reading** Scripture, **stick figuring** biblical accounts and **memorizing** Bible verses. When applicable students will also learn **basic biblical geography**, as well as be able to independently draw the timeline and tell you facts about the major Bible characters and events of the Bible. Each book contains: lessons, timelines, maps, memory verses, and reviews.

- Learn the timeline for the study
- Read, discuss and stick figure the lesson
- Draw 3-4 pictures per page

## **LEVEL 5 (Teen – Adult an independent study)**

These **self-directed studies** will take your students to the next level of Bible study! Students will read Scripture, take notes, answer **critical thinking** questions, use **inductive** Bible study skills, complete mapping assignments, and select hands-on and research projects with each lesson. Level 5 Bible studies will give **context** and **chronology** to the biblical accounts with which your students are familiar, while increasing their overall knowledge of the Bible. Students will also be challenged to **grow deeper** in their faith as they learn from those Old and New Testament characters who have gone before them. **No Teacher Manual** needed for this Bible curriculum.

- Chronological study
- Students read, take notes and answer critical thinking questions
- No stick figures, but hands-on projects and research assignments
